SET & STAGE

RESOURCE MANAGEMENT INC.

Intelligent Lighting Systems
Sound Reinforcement System
Stage, Trusses, and LED Walls
Professional Band Equipment
Live Stream & Live Coverage

Set & Stage Resource Management, Inc.

was established in 2016 to address two interrelated needs in the Philippine media and entertainment industries:

First, the need for skilled production workers, and second, the need to professionalize and raise the status and welfare of grip crew personnel for remote, studio, and live events.

Within its first year, the company became the first in the Philippines to offer fixed-term employment contracts to grip crew workers. It is also the only company in the country that offers an intensive training and certification program for production grips.

After our initial success in the Film and TV world, Set and Stage's entry into **LIVE EVENTS** was a natural evolution for the company. We bring the same level of standardized technical expertise and workplace safety that defines us and we marry it with Equipment Packages designed for every size and scale of event.

MISSION & VISION

It is our ongoing crusade to provide proper training and gainful employment to all Audio Visual workers in the Philippines.

We believe in the brilliance of the Filipino Artist and Entrepreneur. This brilliance cannot be dulled by mediocre technical support for your events, content productions, and live performances. We lead the charge for Filipinos working for their time to shine on the International Platforms.

WE SPEAK MULTIPLE BUSINESS LANGUAGES

We provide easy to **Assess and Audit** packages for the Decision Makers in your company. These packages immediately reflect **Cost vs. Capacity** numbers which are the immediately relevant for the people who sign the checks.

For the Technical Managers, we provide knowledgeable counterparts to discuss the nuts and bolts of your technical rider. We minimize the risk of under delivery during the event by conducting a Technical Needs Assessment early on in the engagement.

From Pre-Production to Forward Planning and everything in between, Set and Stage is there for you!
